Raw Profile Data

Who We Are

Badaea Al Taqnia is the new generation of digital innovation in the Middle East. We believe in clients' needs and strive to exceed their expectations.

Mission

To Make Your Business Paperless

Vision

To Make Your Business Paperless

Our Values

Collaborative

We are committed to working closely with the client organization and consider their success as our success.

Adaptable and Responsive

Our minds, behaviors, and operational processes are constantly evolving, and we strive to be the best at what we do.

Creative and Different

Our goal is to ensure that our clients know why they chose us and have complete confidence that we will deliver on their expectations.

Being Professional

There is more to this than a catch-all statement. In our eyes, it means paying attention to the details and taking action.

Innovative

Together, we will develop creative ideas that bridge all connections.

Badaea WHY

Professionalism

As part of our commitment, we ensure that our obligations are met based on a thorough understanding of the development process, solid knowledge and experience, and complete compliance with safety requirements.

Speed and flexibility

When it comes to adaptability and quick availability for emergencies, we are a flexible partner.

Efficiency

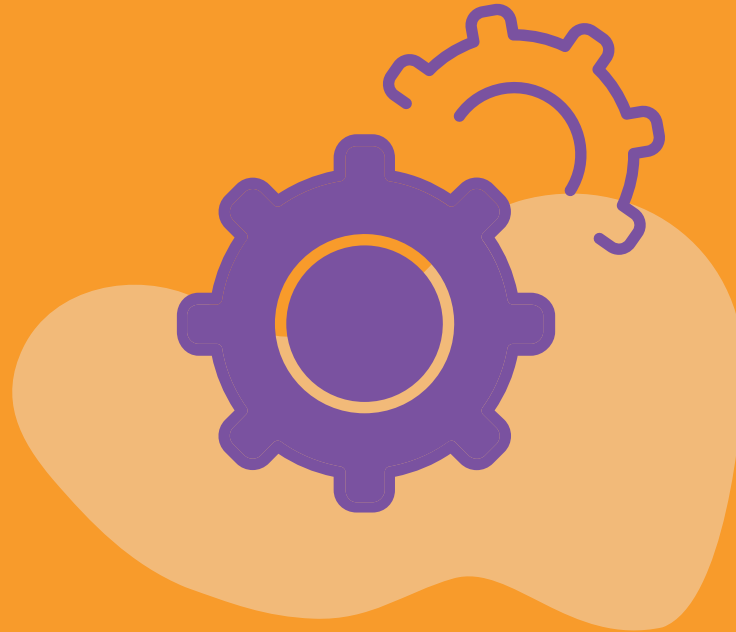

Time and material resources are allocated efficiently to the project, and decisions are made expeditiously to meet the project's goals. This is one of our fundamental principles.

We Know You Well

Knowing the company, its products, and most importantly, its culture and people is key to our process.

Our Services

Our Services

Custom Software Development

From new startups to established businesses, Badaea Al Taqnia offers full-stack custom software development services for web, desktop, and mobile, ensuring scalability and responsiveness at every stage of the process.

Web Development

We provide high-performance web applications customized to meet the unique development needs of B2B and B2C businesses and accelerate business profitability.

Our Services

Product Development

Badaea Al Taqnia offers a complete solution to modernize your legacy software systems or create new software products using our expertise. We understand the scope, explore the potential and reduce development stress with efficient and performing applications.

ECommerce

Develop eCommerce platforms that are engaging, flexible, and sustainable for high traffic volumes with an interactive user experience. By integrating existing ERPs and custom POSs, our technology consulting services enrich the digital experience.

Our Services

Mobile Apps

Our years of technical expertise bring unparalleled capabilities to help your business meet its needs. Our expert mobile app developers create top-notch apps with reliable security and rich features.

UI/UX Design

We develop realistic wireframes and interactive UI / UX as part of software development services that help our clients communicate their business efficiently. Our designers are familiar with the latest trends and design patterns to help you achieve your business goals.

Our Services

Software Testing & QA

Leverage our QA professionals to get superior quality levels and the right team of talented resources for your project needs. Badaea Al Taqnia provides a test automation framework for faster software testing, improved release cycles, and unparalleled robustness.

Enterprise Solution

Our software engineers provide a full range of enterprise application development services, from design to implementation, to address the most demanding challenges by modernizing and upgrading legacy systems and integrating them with newer business applications.
